

RN TO BSN PROGRAM REQUIREMENTS

Program Requirements must be completed prior to starting the first semester of the RN to BSN program, but do not have to be completed prior to enrolling at NMC. Students can complete RN to BSN program required courses at NMC if they like. Please talk to your admissions coordinator to discuss your plan of study and options.

COM 101 - English Composition (3 credit hours)

This course provides instruction and practice in writing, with emphasis on the recursive processes of generating, drafting, revising and editing. Students develop skills in producing and evaluating written communications in private and public contexts.

PSY 101 - Introduction to Psychology (3 credit hours)

This course offers students an engaging introduction to the essential topics in the field of psychology. Throughout this scientific study of human behavior and the mind, students will survey and gain insight into the history of the field of psychology, as well as explore current theories and issues in areas such as wellness, emotion, cognition, motivation, perception, consciousness, social and personality, and memory.

PSY 215 - Lifespan Development (3 credit hours)

The Lifespan perspective involves several basic contentions: development is life-long, multidimensional, multidirectional, plastic, historically embedded, multi-disciplinary, and contextual. Three imperative developmental issues are explored: maturation and experience, continuity and discontinuity and stability and change. Students study how humans develop and how they become who they are.

BIO 225 - Human Anatomy & Physiology I (4 credit hours)

This course will introduce students to basic information required for further study and understanding of Anatomy and Physiology, as well as for the study of all healthcare related subjects. Terminology that is specific to the medical field is introduced. Basic principles of chemistry, physics, embryology, developmental biology, and histology are reviewed/introduced. Students are introduced to the eleven body systems. This course then focuses on enabling students to learn and understand the Anatomy (structure) and Physiology (function) of the Integumentary, the Nervous, the Skeletal, and the Muscular Systems. Laboratory experience will include cadaveric study.

BIO 226 - Human Anatomy & Physiology II (4 credit hours)

The structure and function of the special senses, along with the endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems are stressed in this course. Laboratory experience will include cadaveric study.

Humanities (6 credit hours)

RN to BSN students must have six credits of humanities coursework before the start of the RN to BSN Curriculum. Humanities courses typically include courses from the following subject areas: Art and Music Appreciation, Religion, Philosophy, History, Literature, and Anthropology. *Political science/government courses are NOT transferrable towards humanities credits.*

The baccalaureate degree in nursing at Nebraska Methodist College is accredited by the Commission on Collegiate Nursing Education (CCNE).
